RBPT- a new tool for teacher organized by Dr. Sanjay Gaikwad

~~2018~~ 2017-18

It is a new research based pedagogical tool used for innovative teaching method. In this method, the student and teachers are taking part in the activity to learn by involvement. It improves the thinking power of students. The IISER Pune taking efforts to train teacher. This activity divided into three stages.

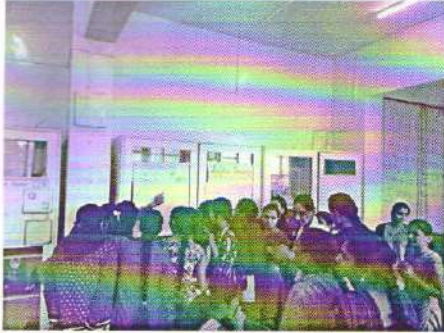

In the first stage student are aware about the concepts by teacher, in second stage the student divided in different groups with certain task. These groups are aware about their look/problem and allow discussing and presenting in rough posters. These rough poster are allow to all students to collect comments to be a best poster Then with help of comments the groups reform a new poster for respective problem and try to be "my poster is best poster". In third step these posters are evaluated by the student from MSc II and teacher. in their method students involve in all question/problems due to giving suggestion other poster he is involve in reading , thinking and expressing their vireos in terms of comments.

In our collage in 2017-18 this activity is done for S.Y.B.SC class on 1st October 2017, an about 10 posters evaluated by the students & teachers.

RBPT workshop at Cochin (Kerala)

Students present their posters

Power point presentations of projects of S.Y.B.Sc. Students : 2015-16

Sr.No.	Roll No.	Name of the Student	Title of the Project
1	2344	Khese Akash Prakash	Number Systems
2	2373	Bhujbal Nishigandha Bhausahab	Mathematics in Cricket
3	2313	Shivale Asmita Ram	Multiplication By Vedic Mathematics Method
4	2391	Daundkar Shubham Jaysing	Magic of Number 9
5	2333	Ingale Vishal Bhausahab	Mathematics used in Ice Hockey
6	2335	Wagh Abhinay Sanjay	Mathematics used in Defence
7	2312	Phadatare Pratiksha Kailas	Digital Root & Magic of Numbers
8	2348	Wani Sagar Balasahab	Number Games
9	2309	Fulari Sunanda Mahanand	Magic of Division & Numbers
10	2311	Gundal Madhuri Kaluram	Daily Uses of Mathematics
11	2356	Bhangare Sarika	Magic of Multiplication
12	2347	Dhumal Aniket	Multiplication to any number by 12
13	2352	Manjare Tejal	Getting answer always 8
14	2354	Kand Sujata	Tricks of Mathematics
15	2353	Kute Komal	Square of two digit number ending with 5

Student Charger Activity

Student Charger Activity

Student charger is an activity run by department of Marathi. Marathi department displays wallpaper titled 'Student Charger'. In this wallpaper, newspaper cuttings are displayed containing articles on those students who have succeeded in life against the adverse conditions by taking hard earned efforts. Such displayed article gives motivation to the students.

Jagdish S.

Dr. Jagdish S. Aute
Head Dept. of Marathi
BJS College, Pune

5. Innovative and Empowering Pedagogical Practices – From Thought to Action (Give details):

1. COOPERATIVE LEARNING METHOD (Teaching method) –

Description of the teaching innovation

This method is implemented from last three years in the college for third year BSc class as a classroom activity. This method gives positive interdependence, individual accountability, interactions, involvement, participation, alertness, respect etc. in every student. It helps to develop their skills like listening, understanding, analyzing, implementation etc. This method worked in three principles such as THINK-PAIR-SHARE. This allows the student to participate. In this method I make different groups of the students and they sit accordingly in the classroom. I explain the concept on the board, then every group is supplied the related question and every group is allowed to discuss. In this discussion, I help and take part to motivate every student of the group, that he/she should take part in discussion. It requires 10 minutes for discussion. Then every group selects a leader and writes the raised points on a paper. Then the leader of each group explains all points in front of whole class with the help of board. Then other group members ask the related question and the presenter group give the answer. The other group gets the marks for their question. If the presenter leader or his group gives the correct answer then it's OK. If not, then I give the answer. In this way, the students make different variety of questions by applying his / her knowledge, which are more creative. In this method every student is involved in the learning process i.e. active participation, as a good listener and gives respect to other students and teacher.

The innovation different from conventional teaching

The conventional teaching method is lecturing method i.e. chalk and talk method, which is one way method. Every student from the class listens, but there is no active participation. When the teacher asks the question, some of the students give the answer. But in the cooperative learning method every student participated continuously in discussion by thinking, pairing and sharing. The students take part in the discussion everybody gives respect to others. Each student gets involved in the concept. Every student develops creative ability to ask the question as well as to give the answer.

The impact of the teaching innovation

Every student involved in learning process. Increase the effective listening ability, deep understanding, develop a communication skill, engaged in interactive learning etc.. The involvement of student results in improvement and development of interest in the subject, in which some of the student who might not generally be interested. The result of the class is improved.

Feedback from the students

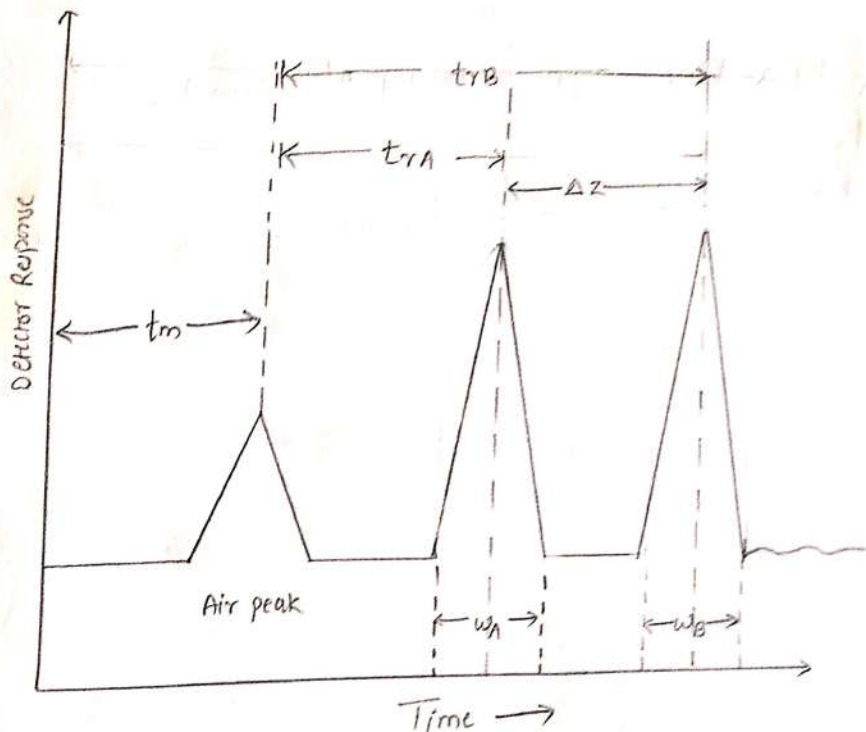

1. The students become more interactive.
2. Every student takes part in learning process.
3. Some of the student not further doing study of this subject in home. The classroom activity is sufficient for them.
4. Knowledge of students is strengthened through continuous improvement

5. Free discussion because of Group assessments. The impact of such assessment favor on student learning
 6. This method helps to think us on the concept
 7. We learn through explaining concepts to other students

Q.4 Explain Gas chromatogram

- | | |
|-------------------------------|--------------------------------|
| 1) Satav Pallavi Shankar | 2) Katke Rani Namdev |
| 3) Shivali Bhagyashri Avinash | 4) Phadtare Nirmala Dattaraja. |
| 5) Yewale Ashwini Dilip | 6) |

Column Resolution, R of column provides a quantitative measure of the column ability to separate two components. The significance of this term is illustrated.

 T.Y.B.Sc. Analytical Chemistry
 GC 15/2/2016

Q.7 What is Principle, advantages and applications of GC

- 1) Waghmare Shital Uttam 2) Gavhane Shaila Madhukar.
 3) Gavhane Chaitali Dattatray 4)
 5) 6)

Principle

The method of separating volatile or gaseous substance by using gas as the mobile phase called gas chromatography. In this chromatography, the stationary phase used may be a solid adsorbent or a nonvolatile liquid, solid surface. The chromatography divided into two types -

- i) Gas solid chromatography (GSC)
- ii) Gas liquid chromatography (GLC)

① Gas-Liquid chromatography - When the stationary phase is a non-volatile liquid coated on an inert support & the mobile phase is a gas, the technique is called GLC.

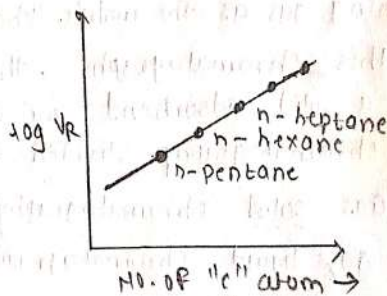

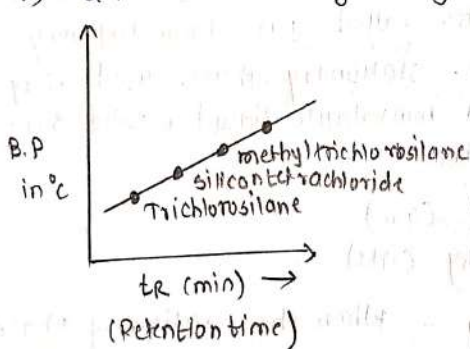

② Gas-solid chromatography :- When the stationary phase is a solid of large surface area & the mobile phase is a gas, the technique is called GSC.

* Advantages of Gas chromatography :

- 1) The technique is popular because it requires a very small amount of sample even for complex mixtures.
- 2) The separations which are impossible by other methods are very easily carried out by GC.
- 3) The technique has strong separation ability & high sensitivity. It gives good precision & accuracy.
- 4) The apparatus required is simple & relatively cheap.

* Applications of GC :-

1) Qualitative Analysis by GC :-

2) Quantitative Analysis by GC :-

3) GC of metal chelates

4) Analysis of drugs

5) Analysis of foods

6) Environmental studies.

Co-operative Learning Method

Jambale Minal Vilas

Msc-I

Co-operative Learning Method मुळे वगति

शिकवलेले समजून घ्यायला ग्रुप सोपे झाले. यामुळे आपला अभ्यास वगतिच होतो बरी जाऊन वाचण्याची गरज पडत नाही. या पद्धतीमुळे आपल्याला उत्तर शोधण्याचे इकाई अवगत होते. यामुळे आपल्या ज्ञानाला भर पडते. या पद्धतीमुळे आपण मित्र-मैत्रीणीमध्ये share करून समजून घेण्यास मदत होते.

यामुळे आपल्याला एखाद्या Topic ची खोलवर माहीती मिळते.

Co-operative learning method

DATE: / /

PAGE NO.:

phadtare Nirmala Dattatraya

class: MSC-1

Date - 6/1/17

Co-operative learning method ही खूप सोपी आणि फायदेशीर पद्धत आहे. या पद्धतीमुळे आपल्या अभ्यास कर्तितच जवळपास समजे पूर्ण होती. या पद्धतीत एका गटात ५ मूल्य असतात. त्यामधला एकजण आपल्या point चे कार्य महत्त्व आहे व त्याच्यावरील सहात्वाचे प्रश्न आणि त्याचे उत्तर समजून देतो. या पद्धतीमुळे आपल्याला पुढे जाण्याची हिंमत येते. मैत्र-मैत्रीमध्ये share करून समजून घेण्यास खूप सोपे जाते.

या पद्धतीमुळे आपल्याला गटचर्चा काय असते हे समजते. या पद्धतीमुळे आपल्याला त्या point ची थोडक्यात माहिती समजते.

Phadtare

Wall paper activity

REPORT

In wallpaper presentation the subject was "spectral Representation of organic molecules" Student display wallpapers in every week. M.Sc. student run ~~thi~~ this activity. This getting detail knowledge about spectra. And also about the 3d representation of spectra .
